Revit Families Amplifiers & Electronics Readme V 1.3

8/2025

Page: 1 / 3

Description of content

This collection represents the d&b Revit families for Amplifiers & Electronics and are based on Revit version 2018. They are created as Communication Device families. All families are composed at a glance in the project d&b audiotechnik Revit Families Amplifiers & Electronics.rvt. It contains all components of the amplifier and - series. Basically, the families are split into column families and accessories families. Accessories are already integrated as nested families in the column speaker families and can be scheduled accordingly.

d&b audiotechnik Materials are already set in the Properties of the families. The materials are also defined for visualization in Revit. The Amplifiers and Electronics families are using custom textures for the front layout.

Intended use

The Revit families in this library are intended to be used for accurate technical visualizations of d&b products and provide accurate data of mounting points for which third-party mounting accessories are permitted. We have omitted proprietary mounting points and simplified constructional details that are not relevant to the purpose of these files for product liability and IP reasons. Should you require a customized mounting solution that uses these proprietary mounting points, please contact your d&b representative to initiate the appropriate design process through our mechanical engineering department.

Detail Levels

The d&b audiotechnik Amplifier & Electronics families support the Detail levels Coarse, Medium and Fine in terms of the back side only.
