

Release Notes. Revit Families U-Series V 1.1

4/2026

Page: 1 / 4

Description of content

This collection represents the d&b Revit families for the U-Series and are based on Revit version 2018. They are created as Communication Device families. The project d&b audiotechnik Revit Families U-Series.rvt contains all components of the U-Series, i.e., TOPs, SUBs and accessories families. Where applicable, accessories are integrated as nested families in the loudspeaker and subwoofer families and can be scheduled accordingly.

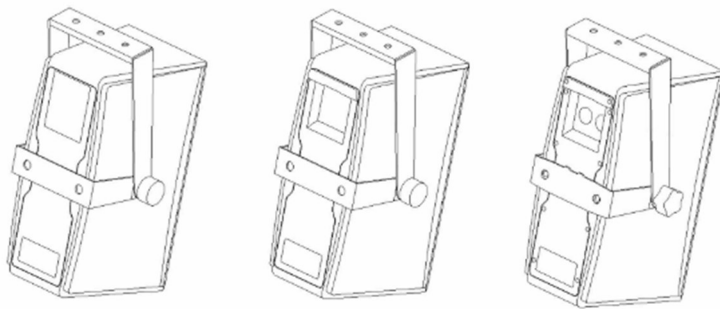

d&b audiotechnik Materials are already set in the Properties of the families. The materials are also defined for visualization in Revit.

Intended use

The Revit families in this library are intended to be used for accurate technical visualizations of d&b products and provide accurate data of mounting points for which third-party mounting accessories are permitted. We have omitted proprietary mounting points and simplified constructional details that are not relevant to the purpose of these files for product liability and IP reasons. Should you require a customized mounting solution that uses these proprietary mounting points, please contact your d&b representative to initiate the appropriate design process through our mechanical engineering department.

Detail Levels

The d&b audiotechnik families support the Detail Levels Coarse, Medium and Fine.

Coarse

Medium

Fine

Release Notes. Revit Families U-Series V 1.1
