

Live performance venues with d&b around the world.

For performers and gig-goers these venues are the lifeblood of cultural vibrancy and artistic creativity. Simple or sophisticated, they provide nothing less than food for the soul, supporting talent development, public engagement and community. Small to medium in capacity, with low ceilings, compact stages and demanding crowds, their vibe is intimate, their atmosphere inspiring. With neutral sound characteristics, impressive power, unobtrusive appearance and flexible control capabilities, d&b systems preserve the authenticity of performance, and unlock the senses for a truly captivating experience.
