

Notes:

Only use plug-ins from trusted sources.

If you use a plug-in from a trusted source, confirm the warning dialog.

The plug-in was tested with the following versions:

- Sketchup Pro 2016, 2017, 2018
- Sketchup Make 2016, 2017, 2025, 2026

For further support, see the help file within the plug-in.

To install the plug-in, please proceed as follows:

Sketchup 2016

1. Click «Menu» ⇒ «Preferences».
Open the «Preferences».
2. Click «Extensions» on the sidebar.
↳ All active and inactive plug-ins are displayed.
3. Click «Install Extension» to navigate to the "***.rbz**" file.
↳ Confirm the warning dialog that makes aware that the installation makes changes to the file system.

Sketchup 2017 / 2018 / 2025 / 2026

1. Click «Extensions»
⇒ «Extension Manager».
Open the «Extension Manager».
2. Click «Install Extension».
↳ A corresponding dialog will be issued.
3. Select the "***.rbz**" file and click «OK» (Windows) or «OPEN» (Mac).
