

d&b ArrayCalc Exchange V1 Release notes

The d&b ArrayCalc Exchange is a SketchUp extension that allows users to convert CAD and EASE files into an ArrayCalc venue file (*.dbacv) that can be imported directly into ArrayCalc.

Requirements

Sketchup 2016 or
ArrayCalc V10.2.4 or higher

V1.2.0

Features:

- Parent group name is used for naming venue objects in nested groups
- Venue object color is taken over from group material

Bug fixes:

- Fixed issue with blank help file under macOS

V1.1.0

Features:

- Grouping of elements by Sketchup layer or group
- Export of venue elements sorted by layer or group
